DESCRIPTION

This course demonstrates how a new scholarship of discovery is redefining what is singular about modern China and modern Chinese history, and offers perspectives derived from Chinese experience over the last three centuries. Part One focuses on the 'the Fittest' as seen through the framework of comparative population behavior - mortality, marriage, and reproduction - and their interaction with economic conditions and human values. Part Two focuses on 'the Chosen' as seen through the lens of comparative opportunity for education. Part Three and Part Four focus on 'the Rich' and 'the Powerful' and address two related questions 'Who gets what?' and 'Who rises to the top?'.

本課闡釋了源自大數據的學術發現如何重新定義近現代中國及其歷史的獨特性。較之此前基於西方經驗及透過西方視角闡釋的人類歷史和社會理論，本課程呈現了跨越三百年歷史的另類中國經驗。利用數據分析的方法，沿著嶄新學術發現的脈絡，我們以四個互相獨立的部分展開具體的案例研究。第一基於比較人口學框架，關注“生存者”；第二通過教育公平比較的視角關注“勝出者”；第三及第四部分則對“為富者”與“有權者”相關問題進行解讀。

DESCRIPTION

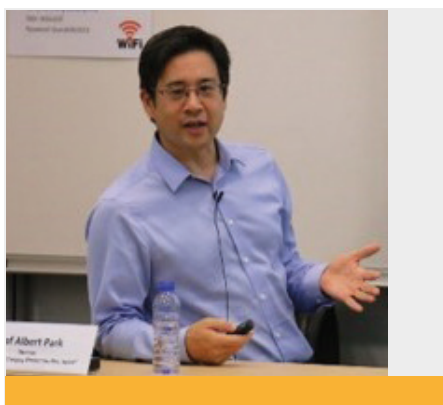

One of the most significant changes in the world in the past 40 years is the opening of China to the outside world and its engagement with that world. In the first 20 years of the opening, external forces influenced China's economy and capital flows, regional (im)balances, internal migration, the interests and power of the bureaucracy, as well as the political authority of local leaders in the coastal areas. More recently, the world is feeling the effects of a rising China which seeks resources, energy and talent from all around the globe and uses its financial wealth to strengthen its influence in the world. This course tracks the opening of China up from 1978 until it joined the WTO (2001), focusing on how the world affected China's internal development. We then look at various aspects of China's "going out strategy"—its search for energy, talent, the Belt and Road Initiative, as well as its relations with the United States and the states within the Asia-Pacific region.

過去四十年全球最具有深遠意義的變化是中國對外開放及參與國際事務。對外開放的最初20年中，外部力量對中國的經濟與資本流動、區域平衡、內部遷移、官僚機構的利益與權力，及其沿海地區地方領導人的政治權威有著全方位的影響。近年來，世界已經感受到中國崛起帶來的影響。中國正在從全球尋求資源，能源和人才，並利用其金融財富來增強其在世界的影響力。本課沿著中國自1978年改革開放的軌跡，重點關注世界如何影響中國的內部發展，並探討中國“走出去戰略”的各個方面，包括探索能源和國才，“一帶一路”倡議以及與美國和亞太地區各州的關係。
